

Why you need Mobile Guardian for Teachers

Take control of the Digital Classroom

At Mobile Guardian, we understand that the growing number of devices you need to manage in the classroom has created a new era of teaching. However, the proliferation of technology and devices also brings with it a growing number of distractions and challenges.

The digital classroom brings multiple opportunities for learning and teachers are now tasked with complying with and delivering the curriculum, whilst teaching students the digital skills they need to succeed in the modern-day workplace.

With Mobile Guardian, teachers can deploy, manage and secure mobile devices in the classroom to deliver a boundless, dynamic and engaging digital curriculum.

Our comprehensive Mobile Device Management (MDM) platform delivers an unsurpassed secure learning environment that simplifies digital classroom management. Mobile Guardian saves teachers precious time, enabling them to maximise teaching and classroom hours to significantly enhance student learning.

Mobile Guardian supports:

iOS

Chromebook

Android

macOS

Why Mobile Guardian in the Classroom

Our dynamic platform has been wholly designed for education. We place control of the digital classroom firmly in the teacher's hand – enabling you to plan and share content, control and limit device use, track progress, eliminate distractions, manage apps and ensure only appropriate content is accessible to students.

You can also share screens, communicate with students and view every device simultaneously via the Teacher Dashboard.

Our dedicated Teacher Dashboard was designed to save you time

The intuitive Teacher Dashboard, enables you to control every classroom device to deliver effective and appropriate educational content. Our tools not only support you in the class, but also streamline planning and reporting, enabling you to take complete control of your digital curriculum delivery.

With our ingenious one-to-one curriculum management and granular reporting, you can keep track of individual student progress and ensure they are each supported according to their learning style, development and needs.

ENHANCING THE DIGITAL CLASSROOM WITH COMPLETE DEVICE CONTROL:

- Plan classes and deliver digital content ahead of class
- Measure student progress with extensive reporting and employ 'heads up' to minimise distractions
- Push content to every device, including apps, videos, URL's and documents
- Maximise teaching time with advanced digital tools including messaging students and mirroring devices
- Create digital timetable with specified device time quotas
- Create and adapt interactive lessons, while controlling application use and web access in class
- Facilitate flipped classroom workflow and support 1:1 curriculum management
- Lock devices to control online access or lock devices to one specific application
