

Kikkake Program

Japan

**How does your school use mobile devices?
What is your mobile device strategy and how does it help drive learning in your school?**

Katariba is a nationwide non-profit organisation in Japan supporting children from needy households who have been left behind in education. We are using Chromebooks to provide children with a web-based platform to learn and connect using a wide range of educational content as well as an online mentoring programme which offers 1-on-1 and group mentoring.

Devices: Chromebooks

What challenge, or problem did you need to solve and how did Mobile Guardian help you solve it?

Katariba Online is working with leading academics in Japan to understand how technology can be used to help children learn more effectively and fully develop their potential. The detailed anonymised usage data that Mobile Guardian is able to provide is invaluable for the research that is being undertaken. We looked at a number of solutions but we found very few that could do what Mobile Guardian is able to do.

What stands out about your experience?

What do you really like about Mobile Guardian?

Mobile Guardian has a very nice and intuitive user interface. We like Mobile Guardian's modular product pricing policy which allows us to select the features we need rather than a lot of functionality that we do not need and their support for multiple platforms.

What is your overall experience with Mobile Guardian?

Overall, very nice! I would definitely recommend Mobile Guardian to school education and IT professionals.

Our Report Card

"Mobile Guardian is the best solution, especially for a multi-platform environment."

Yi Sangyeol
Executive Manager, Katariba Online

About Mobile Guardian

Purpose-built for education, Mobile Guardian is a cloud-based, easy-to-use solution that helps schools safeguard students online, no matter where they are. It offers classroom management tools, secure web-filtering, mobile device management, multi-school management and linked parental controls. Mobile Guardian supports Android, Chrome OS, iOS and macOS devices and is used by schools in North America, the United Kingdom, Asia, Europe and the Middle East.
