

The King's School

Canterbury, United Kingdom

What problem did you have?

We had an existing MDM vendor in place, but were unhappy with the level of support we were receiving from them. We were looking for a new MDM provider who offered the not only the MDM features that we needed, but improved levels of customer support as well.

Devices: iPads

Total Devices: 170

What did you need from an MDM solution?

We needed an MDM solution that would enable us to manage an entire suite of iPads on one platform, allow for content management for our modern language courses and track devices. Most importantly, we were looking for better levels of customer support.

Why Mobile Guardian?

Mobile Guardian's support is a lot better and the initial setup was quick and without hiccups. We went from their web demonstration, straight to trial and then made the purchase once the testing period was done.

Did we solve it?

Yes, Mobile Guardian also offered great customer support when compared with our previous MDM.

What do you like about Mobile Guardian?

Once installed, one of the immediate benefits was the simplification of managing devices within our school. Secondly, the support provided by Mobile Guardian was significantly better than our previous MDM provider.

Our Report Card

"The Mobile Guardian setup process was very quick and without hiccups."

R. Falcon
IT Manager

About Mobile Guardian

Purpose-built for education, Mobile Guardian is a cloud-based, easy-to-use solution that helps schools safeguard students online, no matter where they are. It offers classroom management tools, secure web-filtering, mobile device management, multi-school management and linked parental controls. Mobile Guardian supports Android, Chrome OS, iOS and macOS devices and is used by schools in North America, the United Kingdom, Asia, Europe and the Middle East.
